

Wireframing Guide for Developers & Designers

Wireframing ka naam sunte hi lagta hai ki ye sirf designers ka kaam hai, par yeh ek galat fahmi hai. Wireframing developers ke liye bhi utna hi zaruri hai jitna designers ke liye. Hackathons ho, freelancing projects ho ya startups ke ideas ka execution, wireframing ek fundamental step hai jo sabka kaam asaan karta hai.

Wireframing Kya Hota Hai?

Wireframing ek low-fidelity layout hai jo ek app ya website ka basic structure dikhata hai. Isme sirf blocks, placeholders aur hierarchy hoti hai bina kisi fancy design ke. Wireframing ka aim hai ki hum pehle se plan kar sakein ki kya cheez kahan hogi aur kaise kaam karegi.
